

Gathering of Grand Masters DVDs

These DVDs, due to the amount of footage covering the materials presented over the August seminar weekend, ended up being a LOT more than originally anticipated. While I could have seriously edited a lot of material, the quality of the material presented warranted to include nearly all of the footage shot.

Despite all of the footage shot, I was forced to eliminate the presentation of Master Custer, and I had to discard some of the footage shot of Master Dunchok. Master Custer's footage was of poor quality, and some of Master Dunchok's footage was shot against the light of the open door. That caused some of the footage to "white out" due to backlight issues. Last, I have not been able to find any footage from Master Gordon's presentation. I don't want to wait to produce the DVDs looking for fixes to the above issues, this is what is available now. These DVDs are collectors items that will soon be priceless.
